

R1000 Relay Kit

This relay kit allows you to safely operate 12 volts accessories with the small amperage output from selected Nordskog gauges.

Connect the **WHITE** wire to the output wire from your Nordskog gauge.

Connect the **RED** and **BLUE** wires to a 12+ volt power source that turns on and off with the ignition switch.

Connect the **YELLOW** wire to the power source input on the accessory you wish to operate.
